PORTFOLIO PROJECT

Adinda Miza Juli Yanti

Web Developer(fullstack)

2026

ABOUT ME

I am an aspiring web developer with a strong interest in building responsive and user-friendly websites. I enjoy turning ideas into functional digital experiences using modern web technologies. I am continuously learning and improving my skills in both front-end and back-end development, and I am eager to contribute to real-world projects.

SIS-SPMB

WEBSITE REGION BASED

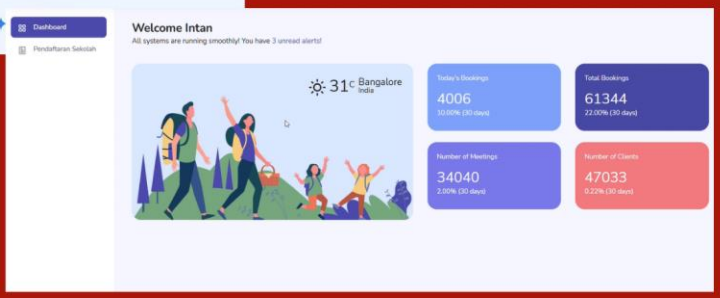

Developer a web-based school registration system (SIS-SPMB) designed to manage junior high school admissions across Padang using a zoning system. The application allows students to register online, select schools based on their residential zone, and streamlines the admission process for both users and administrators.
Built a user-friendly interface and implemented core features such as student data input, school selection, and registration management. This project enhanced my skills in web development, problem-solving, and building real-world digital solutions.

2028

DESCRITION

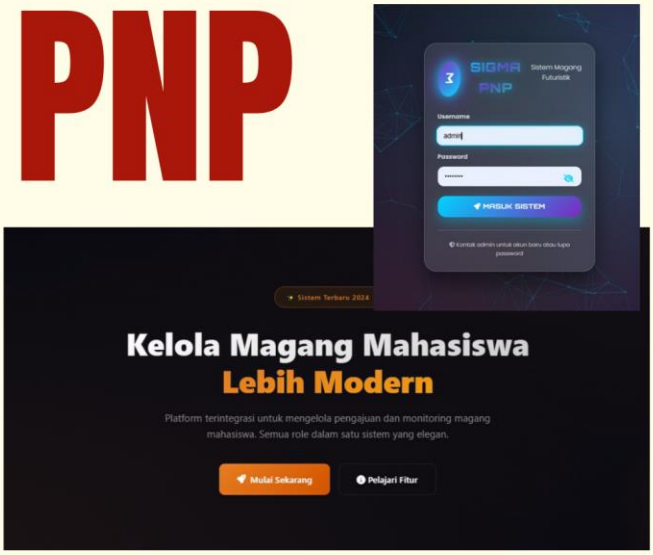

Built using HTML, CSS, JavaScript, PHP, and MySQL, with a focus on creating a responsive and user-friendly interface. Implemented key features such as user authentication, student data management, zoning validation, and an admin dashboard for managing registrations

2026

SIGMA PNP

WEBSITE INTERNSHIP

Developed a web-based internship management system that connects students, companies, and administrators within a single platform. The system is designed to streamline the process of finding, managing, and organizing internship opportunities.
Built using HTML, CSS, JavaScript, PHP, and MySQL. Implemented a multi-role access system with three main users: students, companies, and administrators. Students can browse and apply for internships, companies can post and manage internship opportunities, and administrators can monitor and control overall system data.

PAINANKU

PROFILE REGIONAL WEBSITE

Developed a regional profile website that showcases local tourism, important news, and key information about the area. The platform is designed to introduce the region to a wider audience and provide easy access to essential updates.

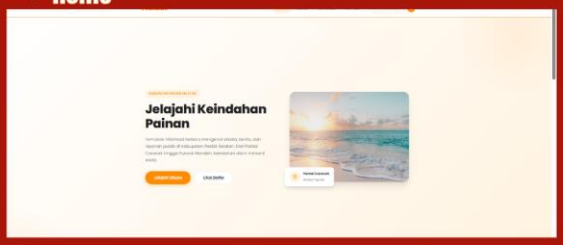

Built using HTML, CSS, JavaScript, PHP, and MySQL, with a focus on creating a clean, responsive, and user-friendly interface. Implemented features such as dynamic content display, news sections, and tourism highlights to improve user engagement.

This project enhanced my ability to design informative web platforms and present structured content effectively.
